

Chimp Jeopardy (Chimpardy)

Middle School

1. Our Chimps (category)
 - a. (\$100) Our youngest chimp.
 - i. Who is Kivuli?
 - b. (\$200) Our oldest chimp.
 - i. Who is Greg?
 - c. Daily Double!
 - i. (\$300) Name the twins.
 1. Who are Charisse & Buttercup?
 - ii. (\$600) The birthdate of the twins.
 1. What is February 24, 2005?
 - d. (\$400) The amount of \$ needed to feed 1 chimpanzee for 1 year.
 - i. What is \$22,000?
 - e. (\$500) The 1st chimp at Project Chimps to climb a tree.
 - i. Who is Latricia?
2. Chimpanzee Communication
 - a. (\$100) The approximate distance that chimpanzees can hear & communicate with each other.
 - i. What is 2 miles?
 - b. (\$200) The expression being communicated when a chimp has a gentle smile and is showing bottom teeth.
 - i. What is laughing, enjoyment, playfulness?
 - c. (\$300) Behaviors such as big open mouths showing teeth, waving arms, manic movement & throwing things exhibit signs of this emotion.
 - i. What is anger?
 - d. (\$400) The facial expression when a chimp has a large smile and is showing top teeth.
 - i. What is a fear grimace?
 - e. (\$500) Vocalization used to communicate excitement, demonstrate social structure, assist in communication while traveling & determining where other chimps are & can be broken down into 4 distinct phases- introduction, build-up, climax and let-down.
 - i. What is a pant hoot?
3. Biology of a Chimpanzee

- a. (\$100) The order of animals chimps belong to.
 - i. What are primates?
 - b. (\$200) The movement when a chimp swings from branch to branch.
 - i. What is brachiation?
 - c. (\$300) True or False: Chimps have been known to treat themselves for diseases in the wild.
 - i. What is true? Chimps have been observed eating plants that can treat parasites.
 - d. (\$400) The scientific name of chimpanzees.
 - i. What is Pan Troglodyte?
 - e. (\$500) The reason why chimpanzees have such good aim!
 - i. What is heightened development in the left hemispheres of their brains & motor cortex?
4. Chimpanzee Behavior
- a. (\$100) Behaviors chimps may use to comfort each other.
 - i. What is hugging & touching? Personal contact?
 - b. (\$200) Behaviors that chimps may use to show dominance over each other.
 - i. What are displaying behaviors? Swaying back & forth, shoving, pushing & throwing objects, using exaggerated movements, running/moving wildly about & screaming/vocalizing, piloerection, drumming & pounding on trees or other things, walking bipedally to appear larger, waving arms.
 - c. Daily Double!
 - i. (\$300) Chimpanzees, like humans, are the only animals to do this with tools.
 - 1. What is make their own tools?
 - ii. (\$600) The scientist who 1st discovered that chimps make their own tools.
 - 1. Who is Jane Goodall?
 - d. (\$400) The type of social society that chimpanzees live in where there is fluctuation in members, sex & environment. Often denotes a society where individuals come together at times (sleep/night), but also spend time apart (foraging/day).
 - i. What is a fission/fusion society?
 - e. (\$500) The 1st villa to go to a fission-fusion society.
 - i. What is Cedar Tree?
5. Wild Chimps vs Chimps in Captivity
- a. (\$100) The estimated number of chimpanzees currently in captivity in the US.
 - i. What is 2,000?
 - b. (\$200) The chimps that have the longest life span.
 - i. What is chimps in captivity?
 - c. (\$300) The estimated numbers of chimpanzees currently in the wild.
 - i. What is 170,000 – 300,000?

- d. (\$400) 2 reasons why chimps can't be returned to their native habitats.
 - i. What is Chimps in captivity would not be able to survive in their native habitats?
 - ii. What is deforestation of their natural habitat?
 - e. (\$500) Features used to identify a baby chimp.
 - i. What is by its small size and the white tuft of hair on its backside?
6. Geography & Laws
- a. (\$100) The law/act that changed to include & protect captive chimpanzees in addition to wild chimpanzees.
 - i. What is the Endangered Species Act?
 - b. (\$200) The official date marking the end of chimpanzees being used in invasive medical research.
 - i. What is Sept. 14, 2015?
 - c. (\$300) The areas where chimps are found in their native habitat.
 - i. What is Equatorial Africa?
 - ii. What is along the forested belt of the Congo River & Gombe National Park in Tanzania?
 - d. (\$400) The types of habitats that chimps naturally live in.
 - i. What are tropical rainforests, lowland forests, swamp forests & savanna woodlands?
 - e. (\$500) The number of African Countries where chimpanzees could once be found.
 - i. What is 21?
7. History of Project Chimps
- a. (\$100) The date the first chimps were brought to PC.
 - i. What is September 2016?
 - b. (\$200) The number of chimps currently are at PC.
 - i. What is 77?
 - c. (\$300) The number of chimps expected to make PC their forever home.
 - i. What is over 200?
 - d. (\$400) The lab where our chimps came from.
 - i. What is the New Iberia Research Center?
 - e. (\$500) The University that is associated with the research lab where our chimps came from.
 - i. What is the University of Louisiana?
