

FUN WITH NUMBERS - CHIMP STYLE

Test our your math skills with these chimp -themed problems!

1. Our male chimps get 4 pieces of fruit in the morning and 4 pieces of fruit in the evening. How many pieces of fruit do the males each eat per day?

2. Our female chimps get 3 pieces of fruit in the morning and 3 pieces of fruit in the evening. How many pieces of fruit do the females each eat per day?

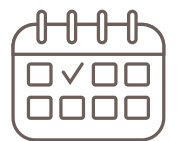

3. If each of our chimps get 1 head of lettuce every day for lunch, how many heads of lettuce will they eat in a week?

4. If we have 79 chimps, how many heads of lettuce do we need each day?

5. There are 14 chimps in Kareem's group. 5 of them are males. How many of them are females?

6. 40 chimps can live in our Chateau building. Currently we have 28 chimps in the Chateau. How many more chimps can move into the Chateau and call it home?

7. We brought our 1st chimps home to Project Chimps in 2016. For how many years have we been bringing chimpanzees to our sanctuary?

8. We can transport 10 chimps at a time to the sanctuary. We want to bring another 120 chimps to the sanctuary. How many trips will that take?

BONUS Who is your favorite chimp? Not sure? Check out our Meet the Chimps page on our website
